

Rates for electric service installation

Non-Commercial Single-Phase Rates

Service requirements and fees are subject to change at any time.

Polk-Burnett will furnish, install, own, and maintain the electric distribution system to the metering point for the following fees:

Installation charge	\$450
Line Extension	\$5.50/ft
Double run of secondary wire (additional fee per foot)	\$2/ft
Installation of secondary wire in conduit (if necessary - additional)	\$1/ft
Construction service (Polk-Burnett-provided).....	\$400
<i>(12 month limit to make service permanent)</i>	
Construction service (Customer-provided).....	\$300
<i>(12 month limit to make service permanent)</i>	
Extra trip charge for service not being ready or not prepared to Polk-Burnett or code requirements	\$200 per trip
Extra trip charge to stub secondary wire to foundation of building for future socket to avoid frost charges	\$200

Additional Fees

- If a new service is connected to an existing installed line of less than five years of age, the new member may be required to pay a share of the initial cost of installing the original line.
- In addition to normal line extension rates, any fees such as local permits charged to Polk-Burnett for extending and constructing the electric service to a new location will be passed on to the member requesting the service.
- There will be an additional charge for boring under obstructions (i.e. roads, driveways, waterways) for underground installations.
- Services to signs, traffic lighting, and storage rental units may incur additional charges dependent upon construction requirements.

Winter Conditions: For underground service performed during winter conditions, the following additional charges and requirements will apply:

- There is an additional charge of \$7 per foot for winter conditions that impede progress of the installation. There also may be an additional labor and/or equipment charge associated with digging our lines into equipment that is required due to frost such as transformers, enclosures, or the meter socket.
- Other options are available such as temporary overhead installation.

Once full payment is received and all service requirements are met, extensions are scheduled on a first-come, first-served basis. For emergency requests of installation of electric service, there will be a three business-day minimum wait for locating underground utilities through Digger's Hotline.

Security Light Installation

Fees and requirements are subject to change at any time.

- Installation of a security light on an existing low-voltage Polk-Burnett pole **no charge**
- Installation of a security light requiring overhead or underground service and a pole..... **\$450 pole setting fee plus \$3 per foot** from Polk-Burnett power source (as determined by Polk-Burnett) to security light location. Polk-Burnett supplies and owns the pole.
- In those instances where a meter pole for electric service exists and can be used for the installation of a security light (as determined by Polk-Burnett)
- After initial installation, requests to change a security light location and/or direction

For more information, see the "Installing or Upgrading Your Electric Service" handbook.
